The Journal VIA INVENIENDI ET IUDICANDI is a space for positive and negative criticism, and for expression, of conclusions, results and findings of the research

Therefore, this issue responds to the strengthening of research activities in the legal field, which is framed in the nucleus or core of the Faculty of Law of the Santo Tomás University (Bogota Branch).

This Edition aims to contribute in a scientific and rigorous way to the development of Law, presenting to the legal community a journal open to national and international research teachers and students from different specializations, master's and doctor's program.

We can only expect a good reception from our readers in each one of the topics presented and invite teachers-researchers to make visible their research products through the journal VIA INVENIENDI ET IUDICANDI.
